

Draft a message that you will use to send out to your network once you are ready for an active job search. Remember to include:

1. A list of your last few positions and mention that you are about to complete the Springboard course. Think your resume condensed into three bullets.

Last position: SpringBoard Data Science Trainee and I'm ending my Springboard course by 10/14/2023.

Resume:

1. Recent graduate of a data science certification with a strong foundation in statistical modeling, machine learning, and data manipulation.
2. Skilled in Python, R, and scikit-learn for developing predictive models and extracting insights from complex datasets.
3. Adept at presenting complex findings to technical and non-technical stakeholders. Eager to leverage skills to drive data-driven solutions for business growth and informed decision-making.

2. Your ideal job title and function, as well as other job titles and functions you'd consider.

Ideal job title: Data Analyst, Data Scientist

A data analyst collects, cleans, and interprets data sets in order to answer a question or solve a problem. They work in many industries, including business, finance, criminal justice, science, medicine, and government.

3. A list of 4-5 companies you'd love to work for. (Hint: Refer back to your Company Research and Titles spreadsheet).

1. Acme Corp
2. Apple
3. TAE Terchnologies
4. Riot Games
5. Found
